

[Plant i Working Time Directive]

Matrix Working Time Directive Switching Box.

Optional dash mounted switching box allows drivers to correctly identify their working hours in accordance with the Working Time Directive.

PLANT I WORKING TIME DIRECTIVE SWITCHING BOX BENEFITS.

As an option for any of the Matrix VMI based systems, the Matrix Working Time Directive Dash Mounted Switching Box allows drivers to correctly allocate and record all working time in accordance with current legislation. The box measures 65mm square and has a touch front panel with red LEDs to show which mode is being logged. The system provides you with the following key performance indicator reports:

- Driver timesheet for the day/week/month showing time started/finished/driving and allowing the company to ensure working time directive compliance.
- Idling time by driver.
- Driving time by driver.
- Over speed by driver.
- Time at stops by driver.

Traceability

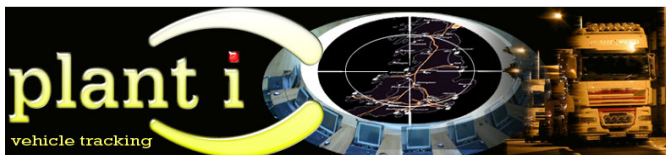

- Allows you to have full traceability of your driver's utilisation during the working day as required by the EU Working Time Directive.
