

[Plant i Gully]

PLANT I GULLY CLEANING VEHICLE APPLICATION

The system is based on T4 and MDT and will give:

- A position update with ignition on every 1 minute giving driving speed and position on a map and in a report.
- A mapped trail of each journey along with a street by street report will be available.
- Detailed position of Gully cleaned.
- Duration of Gully cleaning.
- Pre-set MDT messaging for reasons why a gully could not be cleaned.
- Data available to import into your GIS or as a CSV report.

Suitable for all types of Gully Cleaning Vehicles

Available as an aftermarket fit for all types of Gully cleaners giving detailed route journeys and monitoring of Gully cleaning location and duration.

Standard reports:

- Employee timesheet for the day/week/month showing time started/finished/driving and allowing the company to ensure working time directive compliance.
- Idling time by employee.
- Driving time by employee.
- Over speed by employee.
