

Temperature Monitor

RFID Temperature Monitoring Solution.

Accurate and cost effective temperature monitoring of mobile assets via Matrix RFID temperature tags.

In an environment where legislation requires tractability of the transit temperature of chilled or frozen goods during, the Matrix temperature solution is easily installed on new vehicles or as an aftermarket installation.

MATRIX TEMPERATURE SYSTEM BENEFITS.

Based on the Matrix VMI system, Matrix Temperature provides you with the following key performance indicator reports:

- Temperature View Summary - a view summary of the temperatures recorded for each tag during the selected time.
- Temperature View Journeys- a view the temperatures recorded for each tag during the selected time organised by journeys.
- Driver timesheet for the day/week/month showing time started/finished/driving and allowing the company to ensure working time directive compliance.
- Idling time by driver.
- Driving time by driver.
- Over speed by driver.
- Time at stops by vehicle.

More Profit Reductions

- Fuel costs.
- Overtime payments.
- Paperwork.
- Insurance premiums.
- Communication costs.
- Second visits.

Increases

- More routes per day.
- Client service levels.
- Right dispatch first time.
- Call handling efficiency.
- Prompt appointments.
- Working time directive compliance.
- Operational efficiency.
